Art Unit: 1649

Claims 1 to 28 are pending in the instant application.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 to 13, 16 and 22 to 28, drawn to a purified CB1b cannabinoid receptor, an isolated polynucleotide encoding that receptor, and methods of use.

Group II, claims 14 and 15, drawn to methods of detecting a specified polynucleotide.

Group III, claims 17, 20 and 21, drawn to a compound of unspecified constitution that is a modulator of a cannabinoid receptor and method of use. Claim 21 is included with this group only in so far as it relates to a method of using the claimed compound.

Group IV, claims 18, 19 and 21, drawn to an inhibitory nucleic acid and method of use.

The inventions listed as Groups I to IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The general inventive concept of invention I, an isolated CB1b cannabinoid receptor protein, is not present in any of inventions II, III and IV. The isolated protein that defines invention I is not made by or used in the detection method of invention II. The receptor protein that defines invention I, the modulatory compound of invention III and the inhibitory nucleic

Art Unit: 1649

acid of invention IV are three chemically unrelated compounds that do not reflect a common inventive concept because they lack a common feature or combination of features that distinguishes them as a group from compounds of the prior art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Ulm whose telephone number is (571) 272-0880. The examiner can normally be reached on 9:00AM to 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres can be reached on (571) 272-0867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
